

Boilerplate

Founded in 1995, MBX Systems manufactures server appliances and storage solutions for OEMs, software developers and service providers. MBX offers the most extensive branding options on a wide array of standard or custom-configured platforms. MBX appliance solutions are designed to improve the performance, scalability and security of an application. The systems are manufactured exclusively in MBX's U.S.-based ISO 9001:2008 certified facility. Turnkey appliance support services span design and engineering through global logistics and end user support. For more information visit the MBX website at www.mbx.com or call 800-560-1195.
